PROJECT

Implement a Matrix Class

A part of the Intro to Self-Driving Cars Program

PROJECT REVIEW
CODE REVIEW 3
NOTES
share your accomplishment! Reets Specifications
Congratulations, your project meets specifications!
I've enjoyed very much reviewing your code, thank you for your effort!
Happy coding! :D
Correctness
If your code passes the provided tests in test.py then your project will meet specification for this criteria.
Your code passes all the tests, great job!
determinant() of matrix is calculated the right way and we get the correct output.
trace() of matrix is calculated the right way and we get the correct output.
inverse() of matrix is calculated the right way and we get the correct output.
T() (transpose) of matrix is calculated the right way and we get the correct output.
add() is calculated the right way and we get the correct output.
neg() is calculated the right way and we get the correct output.
sub() is calculated the right way and we get the correct output.
mul() is calculated the right way and we get the correct output.
