Meets Specifications

Hi Student,
You did a very good job in this submission of this project. This was exceptional. I'd like to congratulate you. Please keep up the good work.

Correctness

> **Code passes the provided tests in tests.cpp**
>
> Great job, the code passes all the tests.

> **'initialize_beliefs' is implemented the right way.**

> **'sense' is implemented the right way.**

> **'move' is implemented the right way.**

Code Quality

> **Code quality issues should not make a project non-passing unless they are problematic enough that it is not possible to understand the code at all with a reasonable amount of effort.**
>
> **Readability is important so try to go through your code before submitting to make sure that a reviewer will be able to provide the most helpful feedback for you.**
>
> The code quality is good. I really appreciated going through your code. 👍
